

## Raised floor

Delivery and installation of conductive raised floors including anti-static flooring.

Based on the created installation level, any kind of cabling can be made. At any given point the floor is removable. The sound insulation is achieved by a special plastic insert between the raised floor and the substructure.

## Heavy-duty special floor

MSR heavy-duty special floors, made by its own profile technology, which can withstand even the highest forces. Floor plates can be integrated. At any given point the floor is removable.

Based on the created installation level, any kind of cabling can be made.
